**Monitoring API usage manually through spreadsheets or generic admin consoles is tedious and prone to errors. This solution automates the entire tracking process by fetching your usage data directly and presenting it in a clear, actionable dashboard.**

### What's included:

- 

- Python Integration Script** -- Seamlessly connects to your OpenAI account to pull precise usage data.

- Self-Contained HTML Dashboard** -- Visualize your data with a responsive interface that runs locally.

- Per-Model Cost Breakdown** -- Identify exactly which models, such as GPT-4 or GPT-3.5-Turbo, are driving costs.

- Daily Usage Tracking** -- Monitor spending patterns day-by-day to spot anomalies and trends instantly.

- Budget Exceed Alerts** -- Receive instant notifications when your projected costs approach your set budget.

- 

### Who this is for:

This tool is designed for developers and CTOs integrating OpenAI APIs into production environments, as well as anyone looking to optimize AI costs.

### Real example:

Before using this tracker, a technical lead had to manually export CSVs from the OpenAI dashboard every few days to check costs.

### What you'll achieve:

- 

- Eliminate manual spreadsheet management and human error in cost reporting.

- Immediate identification of high-cost API calls and specific models driving usage.

- Proactive financial control through automated alerts before budget limits are breached.

-
